

# DWC ADVANCED

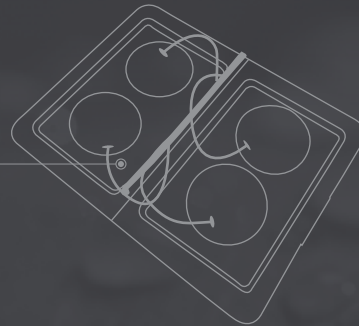

## Dwc systems

### Revolutionary system combining hydroponics + dwc.

The system presents 2/4 drippers characteristics of an active hydroponics system that irrigate the plants roots in their pots. The roots grow out of the pot and they immerse themselves into a constant peroxide nutrient solution. The system is feed from an immersed pump that is guaranteed to recycle the water plus a powerful two-way air pump with porous stones that perfect the amounts of the peroxide solution and consequently benefits the development of the complete apparatus. Thanks to the constant dripping, the system requires little maintenance and the plants always receive the correct amount of fertilizer and releases the excess. The system has is the best quality, performance, time and value. Made of plastic UVA and UVB anti rays (anti algae).

The system includes an instruction manual for how to operate and problem resolution.

Combining  
hydroponics + dwc

### DWC 2

#### DWC ADVANCED 2

DIMENSIONS (CM) 55x35x30

TANK 50L

SUBSTRATE\* Hydrokorrels

NET POTS\*\* 2

PLANTS (MAX) 4

\* Raccomended  
\*\* 18cm diameter

#### DWC ADVANCED 4

DIMENSIONS (CM) 75x55x32

TANK 95L

SUBSTRATE\* Hydrokorrels

NET POTS\*\* 4

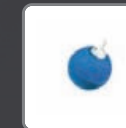

PLANTS (MAX) 8

### DWC 4

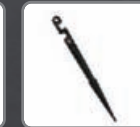

#### ACCESSORIES

Air Stone 05cm  
Air Pump 2 output

#### ACCESSORIES

Dripper autocompensate 2l/h  
Dripper Support

#### ACCESSORIES

Water Pump Sicce MICRA 430 L/h
