

EBB AND FLOOD

Ebb and Flood systems

Yaroots Ebb & Flood Systems are perfect for growers who want to develop specimen plants or accommodate a plant throughout its entire life cycle. In an Ebb & Flood system the table of the system is filled with medium and is periodically flooded with a nutrient solution, it is then allowed to flow away. The plant gets everything it requires as well as oxygen delivered directly to the root system drawn in by the water flowing away.

Why use an Ebb & Flood System?

- Low maintenance
- Suitable for pots and buckets
- Easy access to pump and nutrient
- Interlocking tank & tray for stability
- Low-level system to maximize headroom

SMALL

EBB&FLOOD SMALL

DIMENSIONS (CM)	60x60x50
TANK	45L
SUBSTRATE	Hydrokorrels

MEDIUM

EBB&FLOOD MEDIUM

DIMENSIONS (CM)	120x60x50
TANK	95L
SUBSTRATE	Hydrokorrels

BIG

EBB&FLOOD BIG

DIMENSIONS (CM)	100x100x50
TANK	180L
SUBSTRATE	Hydrokorrels
