

PRODUCER

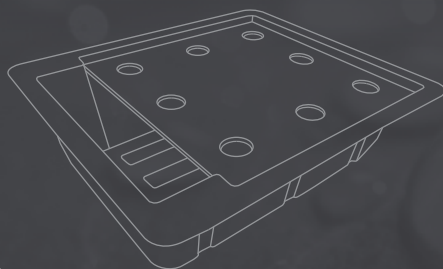

Aeroponic systems

Try aeroponics now ! The first – and most economical – of all aeroponic systems.

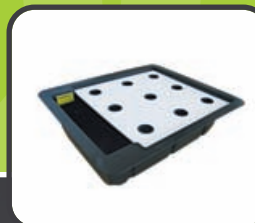

Did you want to try aeroponic but never found a simple and economical way to do it? Well, now it's possible thanks to the Producer growing module.

6 good reasons to adopt it:

- The Producer fits perfectly in small growing areas
- It is made with heavy-duty recycled plastics, and includes a barrier against light and UV to prevent algae from growing in the reservoir
- It holds 1 to 64 plants and may be used for mothers as well as for complete crop cycles
- It has a large reservoir and easy access to the nutritive solution
- It is very easy to assemble, to clean and to maintain. It is user-friendly and comes with a set of detailed instructions
- An Producer means NO MORE SUBSTRATE to move up and down, and to discard. Simply use the plastic net-pots or the coco pots with the coco covers, or, if you really wish, just fill the pots with few clay pebbles
